

V-TWIN'S TOP TEN BIKES OF 2005

Wild West Vigilante Gunfire

On the upper end of the custom V-twin motorcycle market, Wild West's Vigilante Gunfire boast a 280 rear tire, a strutless fender, inverted forks, billet aluminum wheels and brakes, and a very low 21-inch seat height. The Gunfire is powered by a fully polished S&S 111-cubic-inch engine. The extremely low seat height achieved by storing oil in the frame makes the Vigilante Gunfire one of the most distinctive motorcycles to ride.

Customers can log on to the company's Web site to find dealers, request brochures and get more information by visiting their website at
